Part III REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach, disclose, or suggest the claimed limitations of (in combination with all other limitations in the claim), an image reading device comprising storage means for storing signal data comprising plural color signals that are photoelectric converted by color photoelectric conversion means and white document data comprising plural color signals that are read and photoelectric converted by the color photoelectric conversion means from a white document in color equivalent to the white reference means placed on a document table and correction means for executing a color balance correction and a stray light correction simultaneously with an execution of a shading correction based on the signal data and the white document data stored in the storage means wherein the correction means executes the stray light correction by correcting a difference between the signal data and the white document data which are stored in the storage means as claimed in claim 3. Similar features are claimed in claim 10. Therefore, claim 10 is allowable over the prior art of record for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
